

Solutions for Workers' Compensation Claims

Increase claims processing efficiency, accuracy, and timeliness

When it comes to workers' compensation claims processing, the amount of paper involved can be quite burdensome. With additional correspondence and supporting documentation such as medical bills, doctor reports, referrals, insurance forms and prescriptions, a single claim can quickly become a heavy paperweight. PaperFree can provide an automated claims processing solution to significantly lighten this load. Easily reduce your operational costs and increase the accuracy and timeliness of your claims processing operation with this proven solution designed specifically for workers' compensation claims processing.

Benefits of an Automated Claims Processing System

- Increase Accuracy & Efficiency
 - Process claims faster through the use of ICR/OCR automation
 - Process claims smarter - delivering 100% accuracy
 - Reduce transient paper storage by moving claims quicker
- Save Money and Increase ROI
 - Reduce or reallocate your workforce through automation
 - Reduce costly errors associated with manual data entry
 - Reduce costs associated with transient paper storage
 - Reduce or eliminate costs associated with non-compliance
- Make informed decisions
 - Advanced systems monitoring and flexible reporting tools help drive better staffing decisions and ensure optimal usage of the solution

Solutions for Workers' Compensation Claims

Claims Processing Solutions

Inefficient and inconsistent claims handling processes lengthen processing times which negatively impact your bottom line and may ultimately affect overall customer satisfaction. PaperFree integrates a sophisticated suite of products to provide you with the most advanced workers' compensation claims management solution available. Our automated solutions expedite the capture and processing of your healthcare claim forms, transforming paper documents into business-critical information that can be delivered to your claims management system in far less time than it may take you today.

Claims Management Product Suite

- EMC | Captiva InputAccel
- EMC | Captiva ClaimPack
- EMC | Captiva Dispatcher
- FocalPoint (Reporting)
- Clarity (System Monitoring)

Compelling ROI

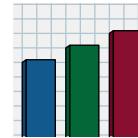

PaperFree's automated solution is specifically designed to automatically capture information from CMS-1500 and UB04 forms and does so with up to 100% accuracy. Through the use of improved imaging and intelligent recognition technologies, the solution captures your critical information, applies complex and comprehensive business rules, validates this data against various backend databases and then exports the claim information without the need for manual intervention allowing you to process a virtually unlimited amount of claims each day! The end result is a significant reduction in workforce, increased accuracy of the data collected, and faster processing times.

Workers' Compensation Experience Counts

When it comes to Workers' Compensation, PaperFree is an industry leader with years of experience and proven success. Our mission is simple - help our customers increase efficiency, accuracy, and timeliness. We do this through the use of best in-class technology, shared best practices, and a commitment to knowing that every new customer has unique needs that should be both learned and appreciated.
